

## CIS 121 Sequence Problems

Develop an IPO Chart and C++ code the following problems. Upload the IPO and code files to Blackboard.

Save your files with the convention PS2P1, PS2P2 etc. PS1P1 is Problem set 1, program 1 etc.

1. Ask the user to enter first and last name. Display a message “Hello [last name]”.

| Input | Process               | Output      |
|-------|-----------------------|-------------|
|       |                       |             |
| fname | Display Hello [lname] | Hello lname |
| lname |                       |             |
|       |                       |             |
|       |                       |             |
|       |                       |             |

2. Allow the user to enter two real numbers. Compute and display the sum of the two numbers.

| Input | Process                     | Output |
|-------|-----------------------------|--------|
|       |                             |        |
|       |                             |        |
| 4     | Calculate sum<br>Sum= 4 + 5 | Sum    |
| 5     |                             |        |

3. Ask the user to enter the last name and score. Format a message that says “[last name] has a score of [score]”.

| Input | Process                             | Output |
|-------|-------------------------------------|--------|
|       |                                     |        |
| lname | Format lname has a score of [score] |        |
| Score |                                     |        |
|       |                                     |        |
|       |                                     |        |
|       |                                     |        |

4. Allows the user to enter three integers. Compute the result =  $(n1 + n2) * n3$ . Display the result.

| Input | Process                               | Output |
|-------|---------------------------------------|--------|
|       |                                       |        |
| n1    | Compute result<br>Result= (n1+n2) *n3 | Result |
| n2    |                                       |        |
| n3    |                                       |        |
|       |                                       |        |
|       |                                       |        |

5. Ask the user to enter two real numbers. Compute and display the sum, product and difference of the numbers.

| Input | Process                         | Output |
|-------|---------------------------------|--------|
|       |                                 |        |
| 9     | Compute Result<br>Result = 9+12 | Result |
| 12    |                                 |        |
|       |                                 |        |
|       |                                 |        |
|       |                                 |        |
